

Plate Magnets

Ferrite and Rare Earth Permanent Plate Magnets

Standard Barrier Strip

Double Tapered Step

Single Tapered Step

Powerful, dependable magnetic protection against the dangers of fine iron and tramp iron contamination.

Rare Earth

Xtreme

The ultimate Plate Magnet with a strong deep field making it ideal to install over a conveyor.

KJB

For use in chutes or suspended over belt conveyors for removal of fine iron and weakly magnetic contaminants from dry and wet free-flowing product. Particularly suited to shallow burdens and for use in the food/pharmaceutical industries where product purity is paramount.

Ferrite Models

Superbrute

The strongest of the ferrite models for suspension over chutes and belts, suitable in particular for removal of large tramp metal contamination.

Brutepower KJF

Designed to handle wood-chip, sugar cane and other extremely difficult tramp iron separation applications.

Maxipower KJD

For extra heavy duty applications.

Superpower KJC

For heavy duty applications where medium to large tramp metal contamination occurs.

Features

- Superior strength-to-weight ratio.
- Seven-year warranty on workmanship.
- Lifetime warranty on magnetic strength.
- Designed for positioning in chutes, ducts, pipelines and for suspended applications.
- Choose from a complete range of five different magnet strengths.
- Greater flange offset to match thickness of heavier chutes or provide for gasketing available.
- Liquid-tight face plate.
- Stainless steel construction.
- Sanitary construction (optional).
- Stepped face plate offers a higher barrier than standard strip to retain spherical types of tramp iron once removed from direct material flow. This feature also provides superior removal and retention of fine ferrous contamination. Available in single or double step design.

Shipping Weights (Kg)
